PROFESSIONAL SUMMARY

Dynamic **Full-Stack Software Developer** with comprehensive experience in architecting, developing, and shipping production-grade web and desktop applications. Proficient in **Laravel, Vue.js 3, React 19, and TypeScript**, with a proven track record of delivering end-to-end features—from relational database design and RESTful APIs to high-performance, component-driven frontends. Expert in **QA Automation (Playwright)** and building **AI-integrated SaaS solutions**. Adept at working across multiple projects in healthcare, project management, and scheduling domains. Committed to writing clean, scalable code and optimizing user experiences through modern technology stacks.

CORE TECHNICAL SKILLS

- **Languages:** PHP (v8.x), JavaScript (ES6+), TypeScript, SQL (MySQL, PostgreSQL), HTML5, CSS3.
- **Backend Frameworks:** Laravel (v11/12), Node.js (Express), Eloquent ORM, RESTful API Development.
- **Frontend Frameworks:** Vue.js 3 (Composition API, Pinia), React 19 (Hooks, Redux Toolkit, Context API).
- **Desktop & DevOps:** Electron.js, Docker & Docker Compose, Git/GitHub, Vite, NPM/Composer.
- **Testing & Tools:** Playwright (E2E & Automation), Vitest, Postman, WebSocket (Socket.io), SSE, OAuth2.
- **UI/Design:** TailwindCSS 4, Bootstrap 5, Framer Motion, Recharts, Responsive Design.

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer | Softleed | July 2025 – Present

Part-Time Developer (Mar 2026 – Present) · Full-Time Developer (Sep 2025 – Feb 2026) · QA Automation Engineer (Nov 2025 – Present) · Intern (Jul 2025 – Sep 2025)

- **Medical Home (Healthcare Management Platform):**
 - Engineered the entire **Staff Management Panel** (Laravel & React.js), coordinating API design, UI implementation, and secure data orchestration.
 - Developed a **real-time SOAP note dictation feature** using a custom microphone mechanism, streamlining healthcare documentation for providers.
 - Architected a **comprehensive Booking Management System** and an integrated SMS/Email notification pipeline to reduce patient no-shows.

- **Taskly & Softleed Dashboard (Internal SaaS & QA):**
 - **Automated 100+ critical user flows** using **Playwright**, significantly reducing manual regression testing time for the flagship Taskly project.
 - Designed and launched the **Real-Time Notification System** for Taskly, utilizing event-driven architecture to improve user collaboration.
 - Built a dedicated **Internal QA Module** (Softleed Dashboard) for managing projects, test cases, and diagnostic reports, optimizing the internal testing lifecycle.
- **Teego (Scheduling Solution):**
 - Delivered the **Bay Availability Module** (Full-stack), implementing high-concurrency scheduling logic and real-time availability tracking for service bays.

KEY TECHNICAL PROJECTS

1. CampaignOS – Smart Campaign Management System (SaaS)

React 19, Node.js (Express), PostgreSQL, Docker Compose, OpenAI API, Socket.io

- Architected a full-scale **AI-integrated management dashboard** for advertising agencies, featuring a 4-step **AI Creative Brief Builder** powered by OpenAI (GPT-4o).
- Implemented **Real-time Performance Analytics** using Recharts and **WebSockets (Socket.io)** for instant condition alerts (budget breaches, CTR drops).
- Engineered a **modular 4-container Docker architecture** (API, AI-Service, Notifications, DB) for seamless production orchestration and instant deployment.
- Integrated **Server-Sent Events (SSE)** for streaming AI responses and implemented robust Express validation and rate-limiting middlewares.

2. FileFusion – Multi-Cloud Storage Manager (Full-stack)

Laravel 12, Vue.js 3, Pinia, Google & OneDrive APIs, OAuth2, Sanctum

- Developed a unified **multi-cloud file management app** integrating Google Drive and Microsoft OneDrive via OAuth2, enabling cross-platform file browsing and navigation.
- Managed complex **OAuth2 token lifecycles** with automatic background refresh and secure session handling using Laravel Sanctum.
- Built a high-performance **SPA frontend** with folder-level navigation, metadata previews, and dynamic file search functionality.

3. Shoba-Nazam v2 – Organizational Management SaaS

Laravel, Vue 3, Pinia, Chart.js, MySQL, TailwindCSS 4

- Developed a specialized **SaaS platform for educational/organizational management**, featuring modules for student tracking, discipline records, and multi-madrassa management.
- Built a **real-time analytics dashboard** using Chart.js to visualize institutional metrics and student performance data.
- Implemented **Role-Based Access Control (RBAC)** and comprehensive audit logs for sensitive data management.

4. System Performance Tracker — Desktop Application

Electron, React 19, TypeScript, IPC, Vitest

- Engineered a cross-platform **desktop monitoring tool** that tracks real-time CPU, RAM, and Storage utilization via Electron's main/renderer processes.
- Developed a **custom frameless UI** with system tray integration and live-updating telemetry charts.
- Ensured 95%+ code reliability through **Unit Testing (Vitest)** and **E2E Testing (Playwright)**.

EDUCATION

BS in Software Engineering

Virtual Universty of Pakistan | 2026 - present
